

# ROOF CURB – CD

## Description:

Roof curbs are placed on the roof plane; they serve as a support structure for the roof base. Roof curbs are available in an angular design. Such curbs are installed on sloping roofs. Manufactured with or without insulation.

## Characteristics:

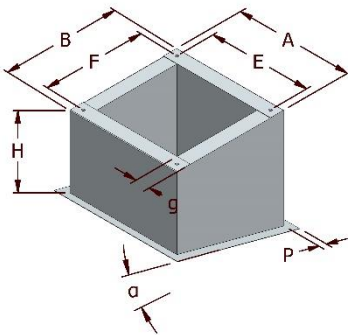

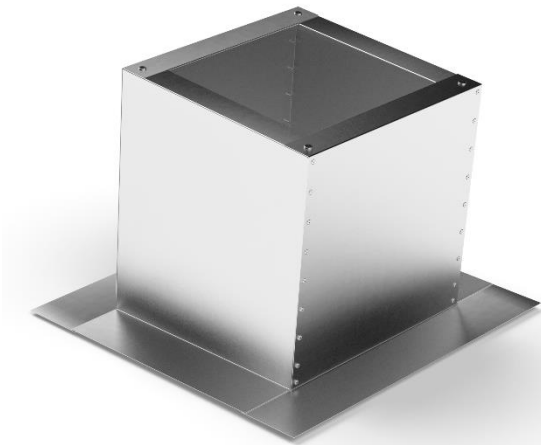

Sheet type: galvanized

Connection method: seam lock, spot weld, rivets

Standard design: P = 100 mm, H = 500 mm, g = 50 mm

Leakproofness standard: Class A, Class B, Class C

Insulation standard: IBB 50 mm

## Sample manufactured element dimensions:

A (mm)	B (mm)	H (mm)	E (mm)	F (mm)	P (mm)	g (mm)
200	200	500	150	150	100	50
300	300	500	250	250	100	50
400	400	500	350	350	100	50
500	500	500	450	450	100	50
600	600	500	550	550	100	50
700	700	500	650	650	100	50
800	800	500	750	750	100	50
1000	1000	500	950	950	100	50
1400	1400	500	1350	1350	100	50
