

TRANSMISSION SYSTEM – REDUCER – QS-ROS

Description:

Transmission System reducers are manufactured at diameters ranging from 160 to 600 mm. Individual elements are connected with clamping hasps. This makes the on-site installation easier and faster. The Transmission System is designed for dust removal systems. Made of galvanized metal sheets.

Characteristics:

Sheet type: galvanized
 Connection method: seam lock, spot weld
 Standard design: $h = 50$ mm
 Endings: outward bending 7 mm

Manufactured element dimensions:

Ød1 (mm)	Ød2 (mm)	L (mm)
160	180	125
180	200	125
200	225	130
225	250	130
250	300	160
300	315	160
315	350	200
350	400	200
400	450	200
450	500	250
500	550	250
550	600	300
